HACK-AI-THON 2026 · EXAMINER USER GUIDE

Learn4All
Test every feature in 15 minutes

Learn a little every day · Classes 6 to 10 · Student and Teacher views

STEP 1

Start the app

1. Extract the ZIP, open the `src` folder.
2. Windows: double-click `RUN_LEARNTRACK.bat`. Any OS: run `python main.py` (Python 3.8+, nothing to install).
3. Open `http://127.0.0.1:8765` in Chrome or Edge.

Demo data (10 students, 180 assessments, 74 quiz attempts, 50 marks) is created automatically on first launch.

STEP 2

Log in

TEACHER / SCHOOL ADMIN

T001

Password: teach123

STUDENT (BEST FOR DEMO)

D6S007

Password: Demo6!007

ALL DEMO ACCOUNTS · FICTIONAL STUDENTS, ALL CLASS 6

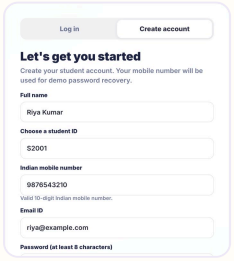

Student logins: ID D6S001 to D6S010, password Demo6! + the same three digits

D6S001	Aarav Mehta		**D6S002**	Diya Sharma		**D6S003**	Kabir Patel	
D6S004	Anaya Rao	dyslexia-friendly	**D6S005**	Vivaan Iyer		**D6S006**	Meera Nair	large print
D6S007	Arjun Das	most data	**D6S008**	Siya Kapoor	screen reader	**D6S009**	Reyansh Singh	inactive
D6S010	Aanya Joshi	older activity						

Example: D6S003 uses password **Demo6!003**. Use D6S009 and D6S010 to see how a teacher spots students who have not been active. All names are labelled (Demo): no real student data.

OPTIONAL

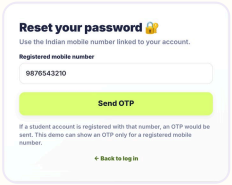

Create your own account

1. Click **Create account**.
2. Full name, a student ID (3 to 12 letters or digits), 10-digit Indian mobile (starts 6 to 9), email, password of 8+ characters (strength bar shown), confirm it, choose class 6 to 10.
3. Log in with the new ID. The new student starts with an empty dashboard.

OPTIONAL

Forgot password (demo)

1. Click **Forgot password?**
2. Enter the registered mobile number.
3. The demo shows a 6-digit OTP **on screen** (no SMS is sent). Enter it, set a new password.

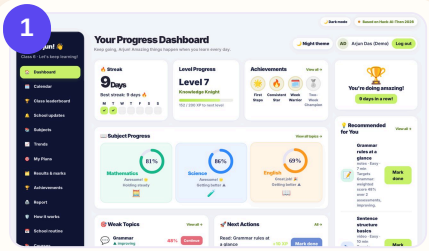

OTP expires in 5 minutes, 5 attempts. Works only for accounts with a mobile number (not T001 or the demo students).

Prefer to watch first? A 75-second screen recording of the full student and teacher tour is supplied with this guide: **Learn4All_Walkthrough.mp4**.

PART A · STUDENT ACCOUNT

Log in as D6S007 (Arjun Das) and follow these 11 steps

1

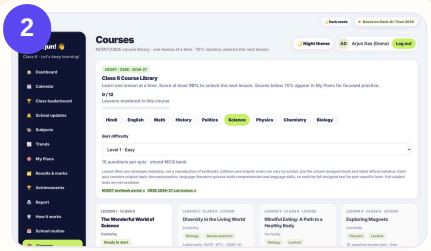

Dashboard

Dashboard

Streak (9 days), Level 7 progress bar, achievements, subject progress rings, weak topics, next actions and the **Recommended for you** list with a Mark done button.

2

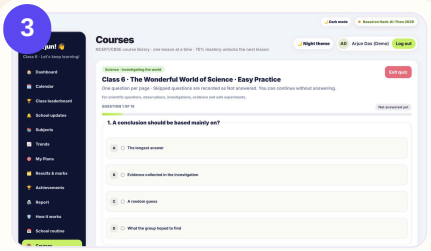

Courses and level choice

Courses

303 NCERT-linked lessons for Classes 6 to 10. Use the subject chips, open a lesson's revision guide, then choose **Easy, Medium or Hard**.

3

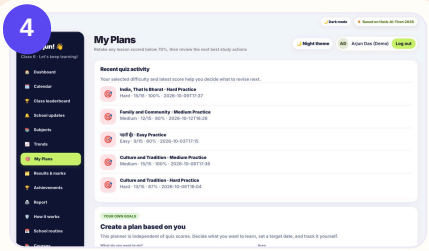

Take a quiz

Courses, Start

15 MCQs with shuffled A to D options. Submit to see every answer reviewed. Pass at **70% or more** to unlock the next lesson.

4

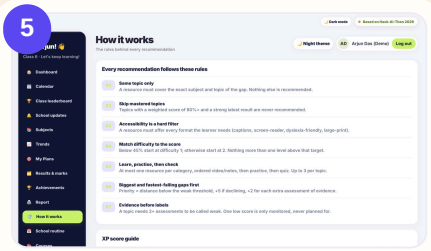

My Plans: retakes

My Plans

Lessons below 70% appear first with best score, progress-to-target and a Retake button. A weaker retake never removes earned mastery or XP.

5

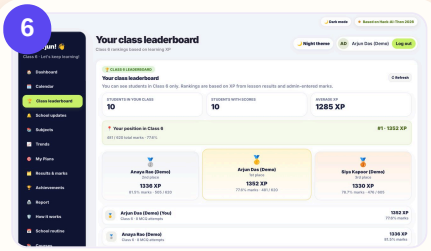

Why was this recommended?

How it works

The 7 explainable rules (R1 to R7). Every recommendation on the dashboard shows its own **Why this?** reason.

6

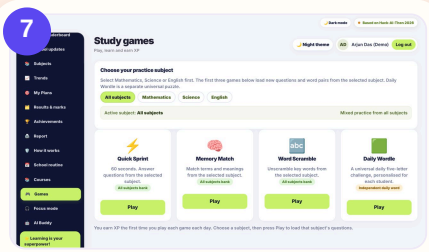

Class leaderboard

Class leaderboard

XP ranking for your own class only. XP equals your best score, so repeating a quiz cannot farm points.

7

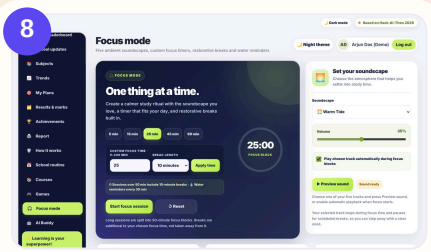

Study games

Games

Quick Sprint, Memory Match, Word Scramble and **Daily Wordle** (6 guesses, XP once a day, a private word per student).

8

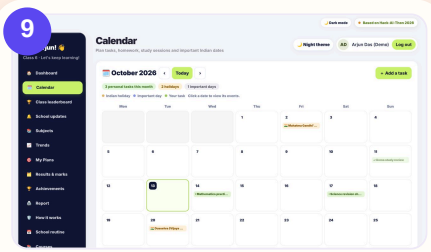

Focus mode

Focus mode

5 to 240 minutes, 50-minute blocks with 10 or 15 minute breaks, water reminders and 5 local soundscapes with volume and preview.

9

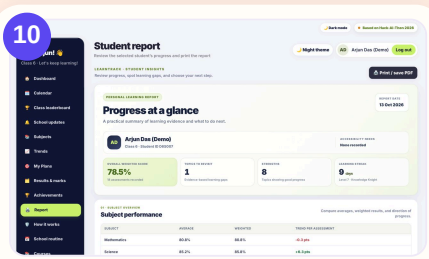

Calendar and routine

Calendar, School routine

2026 Indian holidays plus your private tasks. Routine shows today's plan with per-activity reminders (click **Enable alerts & test sound**).

10

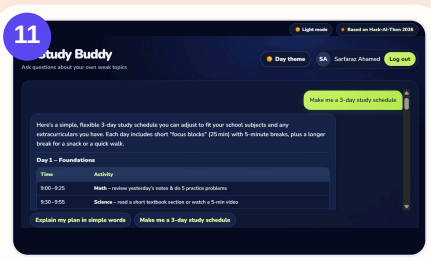

Report, trends, marks, notices

Report, Trends, Results & marks, School updates, Achievements

Printable report (Print / save PDF), score trends, marks entered by the teacher, school notices to mark as read, and milestone badges.

11

AI Study Buddy (optional)

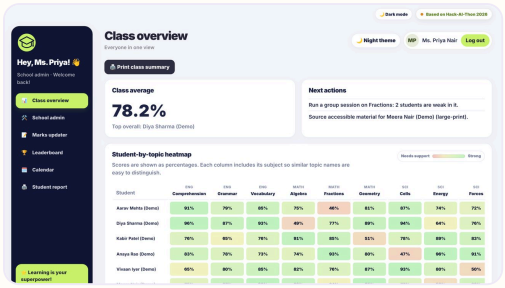

AI Buddy

Chat about your weak topics or ask for a schedule, in English or Hinglish. Configured and answering live (screenshot). Needs a Groq key in a file named exactly `src/.env` ; without it the rest of the app works and this page says it is off.

PART B · TEACHER / SCHOOL ADMIN ACCOUNT

Log in as T001 and follow these 5 steps

1

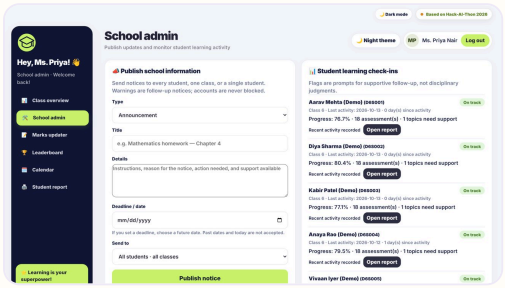

Class overview and heatmap

Class overview

Login T001 / teach123. Class average (78.2%), **Next actions** (e.g. group session on Fractions) and the student-by-topic heatmap. Orange cells mean needs support. Try **Print class summary**.

2

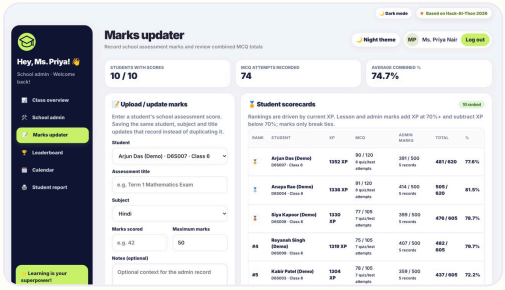

School admin: notices and check-ins

School admin

Publish a notice to **everyone, one class or one student** (supportive warnings are available). The archive shows read or pending per student. Check-in flags are for support, never punishment.

3

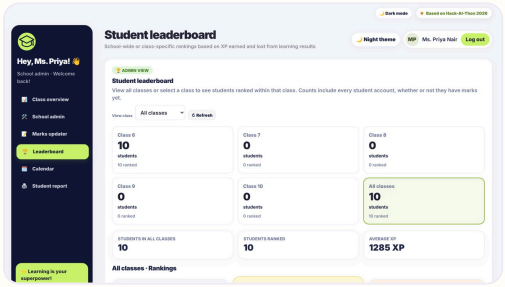

Marks updater

Marks updater

Enter or revise a student's marks. Saving the same student, title and subject updates it instead of duplicating. The student sees it under **Results & marks** after a refresh.

4

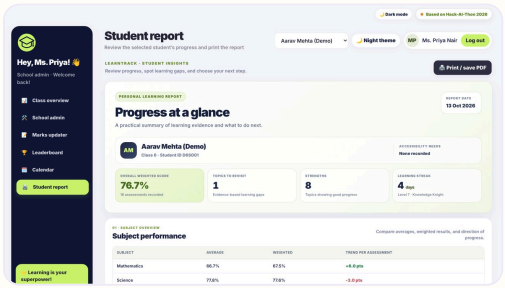

School-wide leaderboard

Leaderboard

View All classes or filter Classes 6 to 10 (Class 6 has 10 ranked students). XP is the primary rank, then mark percentage.

5

Student report

Student report

Pick any student (try D6S009 or D6S010) to read strengths, topics to revisit, learning streak and the printable evidence-based report.

ALSO AVAILABLE TO THE TEACHER

Calendar

Same Indian-holiday calendar and private tasks as students.

SECURITY CHECK (30 SECONDS)

Role separation

Log out, log in as a student: there is no School admin or Marks updater menu, and the server refuses admin requests (HTTP 403).

FOR THE EXAMINER

Feature checklist: tick each one as you go

- [ ] **Create account (validation + strength bar)**
  Login page
- [ ] **Forgot password with demo OTP**
  Login page
- [ ] **Personalised recommendations + Why this?**

- [ ] **All-classes leaderboard**
  Teacher · Leaderboard
- [ ] **Student blocked from admin routes**
  Student account

GOOD TO KNOW

Honest limits of this demo

- All learners and scores are **fictional**, labelled (Demo).
- The password-reset OTP is shown on screen; **no SMS** is sent.
- AI Study Buddy is **configured and answering live** (Groq, checked 13 Oct 2026). On a new computer it needs a free key in `src/.env`, not .env.example.
- Quiz questions are original practice material, not an official NCERT bank; difficulty levels are heuristic.
- Alarms work only while the page is open in the browser.
- Runs locally only (127.0.0.1). Change the T001 password before any shared use.

RESET AND RE-TEST

Useful commands

- Run the 35 automated tests: `cd src` then `python -m unittest discover -s tests -v` (expect **OK**).
- Reset all data: stop the app, delete `src/learntrack.db`, start again.
- Print a report in the terminal: `python main.py --demo`
- Optional AI: copy `src/.env.example` to a new file named `src/.env`, add your own `GROQ_API_KEY`.
